

ACHIEVEMENTS OF THE YEAR' 2008

WORKSHOPS

Workshops on Web Designing:

TABLE LESS WEB PAGES

As now days, technology is growing day by day and the programmers need to get updated as soon as they could. So, about the CSS and the Ajax technology there was a detailed workshop was held at APTECH in which students were told the practical implementation of it on the web page designing. Working on tables in HTML has been a very old trick for the designers but now as the new browsers are been launched in the market, it is difficult to handle them on each browser similarly. So, this difficult is now overcome by the CSS or TABLE LESS WEB PAGES. And that was been very helpful for the professionals as well as the newbie.

Workshop on Photoshop:

For a web developer it is also necessary for him to get known of the other tools that may help him in enhancing his product. By considering this importance APTECH also held another workshop on the Photoshop. In which the usage of the graphic tools and the designing of images were taught which could help a web developer to enhance his/her website or a application developer could make the attractive and professional applications.

Workshop on ZBrush:

ZBrush is a digital sculpting tool that combines 3D/2.5D modeling, texturing and painting. ZBrush is used as a digital sculpting tool to create high-resolution models (up to millions of polygons, and theoretically unlimited) for use in movies, games, and animations. It is used by companies ranging from ILM to Electronic Arts. They can also be exported as a displacement map, although in that case the lower poly

version generally requires more resolution. Or, once completed, the 3D model can be projected to the background, becoming a 2.5D image (upon which further effects can be applied). Work can then begin on another 3D model which can be used in the same scene. This feature lets users work with extremely complicated scenes without heavy processor overhead. And more about this application were told to the graphics students in the workshop on ZBrush so that they can also work on the digital graphics and can enhance their work.

Job Placements:

During the studies and after the studies it is very necessary to apply the learned work to achieve their objectives of studies. For this purpose some of the very able students were been placed at different positions in different organizations regarding to their fields so that they can implement what they do study, get a market experience and get the guts of perfectionism and professionalism.

Following are some achievements in the form of the Student's Placements

Date: 1 Nov 2008		Venue: Network Optimize Solution
Employer:		Clint Fernandez-Director Operations
Requirment:		CCNA ,Trouble Shooting
Student Name	Batch Code	Employer Comments
Gul		Amit panjwani & Hasan askari has been Hired
Mohim		
Amit panjwani		
Rizwan		
Xavier David		
Mathew	All students Selected by Teacher	
Syed hassan		
S Hasan Askari		
Maleem		
Waqar		
Sarwar		
Rizawn Sheikh		
Wasif		

Geo (Web Services)		
Date: 17 Nov 2008		Venue: Aptech SF
Employer:		Asif latif-Group Manager web services
Requirment:		HTML-DHTML,Photoshop,Flash
Student Name	Batch Code	Employer Comments
Zohaib hasan	CF200708B2	<p style="text-align: center;">Good Comments for all students, Waqar Akram, Hussain Abdul Hussain ,M Zeeshan, Zohaib Hasan & Shariq has got the internship</p>
M Zeeshan	CF200708B2	
Zeeshan Alam Khan	CF200708B2	
Waqar Akram	CF200708B2	
Nabeel	CF200608E	
Rao Waqar	CF200608E	
Mohsin Ayub	Cf200708C	
Ali Khan	CF200709E	
Shariq Khan	CF200709E	
Hussain Abdul Hussain	CF200708B2	
Waqar Tech(Software House)		
Date: 13 Dec 2008		Venue: Aptech SF
Employer:		Mr waqar Shah- 03012457796
Requirment:		java,sql,css,XML,Linux
Student Name	Batch Code	Employer Comments
Abdul Waqar		<p style="text-align: center;">Abdul waqar, Khashif Khan and Fahad saeed has hiered</p>
Kashif Khan		
Kashif hussain		
mareena		
Nasir Masih		
Mohsin Ayub		
umer Aziz		
Fahad Saeed		
Zeeshan Amin Khan		
Danishwer Abdullah		

APTECH Annual Dinner:

Like every year Aptech Shahra-e-Faisal arranged an annual dinner to celebrate its anniversary, to appreciate the top scoring students of the year and to give students a peace of mind and a way for them to gather. The whole evening was named OCTUS. The theory behind the OCTUS was that that Oct means eight and is was the eighth anniversary of APTECH (Shahra-e-Faisal) so the management named it the OCTUS.

Participations of students were included in Casual Fashion Show, singing, dancing, short plays including an English play and some comedy skits. From the start till the end all the performances were done with a heartiest effort to make the evening beautiful and successful. Students did rehearse along with their studies. Their faculty also encouraged them for their extra-curricular activities. In such kind of activities student get a confidence to face any kind of audience in life or in professional.

The dancing performed by the students was outstanding. The acts in plays were natural and real. The students that participated in singing put their efforts to make the crowd enjoy. The comedy acts in plays made the audience laugh and loud. And the mega part of the event that was the fashion show made the evening more brighten and sparkling. The branded costumes, the branded makeover and the coverage of channels made it a glorious evening.

Book Fair:

Books are the best friends of human and as well as human mind. Considering this logic of studies Aptech arranged an I.T. Book Fair for students in which the books about the programming, databases, web developing and graphics were included. Students took part in it with a keen interest. They picked up their regarding books. However the book fair was held almost for a week but the books were finished within the half of the week which meant the interest and appreciation of the students about the I.T. Book Fair. The tag line for this Book Fair was “Reading is the food for soul”.

Workshop for Schools:

For the awareness of I.T in the female section Aptech arranged the workshops in girls' schools and colleges. As the time is passing in every field both the genders are moving fast and creating high edges. For that reason Aptech held workshops in different schools and colleges for women that were,

- Avicenna High School
- Happy Home School
- Ayesha Bawani School
- PECHS Girls School
-
- PECHS Girls College
- Khatoon-e-Pakistan Girls College

This workshop was about the fundamentals of computers and Microsoft Office, their advantages and their usage in their studies. A very positive result of this workshop was shown by the students that some of them came to join.

Summer Camp:

During the summer vacations of school and college going students, they need to do some kind of activity that may help them to release the pressure of the studies and that give them some extra knowledge. For this purpose Aptech arranges yearly based Summer Camp in its campus. Similarly, this year Aptech offered school and college students to study in a relax environment. And there wasn't any age criteria that were been ignored. From the age of 8 to the age of 18 may study those courses and that's why along with the school going students also, the college going students also got enrolled in the Summer Camp.
